TAP Technology Platform: Summary

- Widely applicable for cancer huMAbs
- Generates product candidates with superior preclinical efficacy
- Incorporated into two product candidates currently in clinical trials:
 - SB-408075/ huC242-DM1 (GlaxoSmithKline)
 - huN901-DM1 (ImmunoGen/ British Biotech)
- TAPs under preclinical development include Herceptin®-DM1 (Genentech), MY9-6-DM1 (ImmunoGen)
- Agreements with Genentech, Abgenix, Millenium, and others to develop additional huMAb-DM1 TAPs
- Additional ImmunoGen TAPs are under development
